

The Many uses of Cannabis Sativa

Renown world wide through out history as the amazing industral 'Hemp' & as the controversial flower its all in the growing technique, and strain (more oil, more resin, stronger fiber, THC/CBD Content) .

The World's Most Valuable & Versatile Natural Resource

STALK FOR FABRIC, FUEL, PAPER & COMMERCIAL USE. Hemp is dried and broken down into two parts: thread-like fibers and bits of "hurd," or pulp. Each has its own distinct applications:

Popular Mechanics
Called it Billion \$ crop
in Feb 1938.
Replaces lumber
4 acres to 1.
If 6% of the US
was growing cannabis
our energy needs would be met

The long bark fiber, at 77% cellulose, is cleaned and spun into thread, yarn or rope, or woven or knit into a variety of durable, high-quality textiles for clothing, canvas and fabrics of many textures.

The inner core that remains is called hemp hurds, with cellulose for tree-free, dioxin-free paper; non-toxic paints and sealants; industrial fabrication materials; construction materials; hemi-cellulose for plastic, and much more! Hemp is the best sustainable source of plant pulp for biomass fuel to make charcoal, gas, methanol, gasoline or even produce electricity.

SEEDS FOR OIL & FOOD: Hemp seeds produce oil for cooking, lubrication, fuel, etc. The seed is a cholesterol-lowering source of full protein. Leaves and flowers are also edible.

Cannabis known as סוביגָן in Hebrew and was known for its medical & industral (oil/paper/ Antibiotic) use, likely by Yeshua (Jesus) himself. The bible and other faiths credit this specifically as a gift from the Creator & it relieves impac from our sins (pain, famine).

FOLIAGE FOR MEDICINE, FOOD & RELAXATION.

Cannabis has important medical value for easing pain, relieving stress and treating illnesses from glaucoma to cancer to nausea to AIDS and beyond. Hemp flowers and leaves are smoked or eaten for many therapeutic, religious and relaxational purposes.

ROOTED IN NATURE: Even the hemp roots play an important role: they anchor and aerate the soil to control erosion and mud-slides. Hemp can save family farms, create jobs, reduce acid rain and chemical pollution, and reverse the 'Greenhouse effect'.
